RANKING CLIMATE CHANGE CAUSES

Learning Outcomes for Grades 5-12
Prepared by Climate Change Connection

Depending on the lesson planned, students should be able to achieve some of the following suggested learning outcomes.

Grade 5 Social Studies & Science
- S-103 Make decisions that reflect care, concern, and responsibility for the environment.
- VC-002 Be willing to contribute to their groups and communities.
- 5-1-15 Explain how human health may be affected by lifestyle choices and natural-and-human caused environmental factors.
- 5-4-18 Recognize that climates around the world are ever changing, and identify possible explanations.

Grade 6 Social Studies & Science
- S-103 Make decisions that reflect care, concern, and responsibility for the environment.
- KE-058 Give examples of ways in which industry and technology have changed life in Canada since 1945.
- KL-026 Describe the influence of the natural environment on life in Canada.
- VL-011 Value the natural environment.
- 6-3-16 Identify renewable and non-renewable sources of electrical energy, and discuss advantages and disadvantages of each.
- 6-3-18 Describe factors that affect the consumption of electrical energy, and outline an action plan to reduce electrical consumption at home, at school, or in the community.

Grade 7 Social Studies
- S-103 Make decisions that reflect the principles of sustainable development.
- KC-004 Describe ways in which their personal actions may affect quality of life for people elsewhere in the world.
- KL-026 Identify human activities that contribute to climate change.
- KL-027 Describe social, environmental, and economic consequences of climate
change.

- KL-029 Give examples of the impact of human activity on the natural environment in a society of Europe or the Americas.
- KE-053 Describe sustainable development issues in a society of Europe or the Americas.
- KE-054 Give examples of the environmental and social impact of consumerism in the local community and in a society of Europe or the Americas.
- VL-009 Be willing to take actions to help sustain the natural environment in Canada and the world.
- VE-017 Be willing to consider the consequences of their consumer choices.

Grade 8 Social Studies & Science

- S-103 Make decisions that reflect the principles of sustainable development.
- VI-004 Be willing to consider differing world view.
- VL-008 Appreciate the importance of sustaining the natural environment for future societies.
- 8-4-17 Identify substances that may pollute water, related environmental and societal impacts of pollution, and ways to reduce or eliminate effects of pollution.
- 8-4-18 Identify environmental, social, and economic factors that should be considered in the management of water resources.

Grade 9 Social Studies & Science

- S-103 Promote actions that reflect the principles of sustainable development.
- KE-048 Evaluate the implications of living in a consumer based economy
- KE-051 Analyze possible consequences of their consumer choices.
- VE-017 Be willing to consider the impact of their consumer choices.
- VL-007 Be willing to make personal choices to sustain the environment.
- VE-018 Be willing to consider ethical questions related to sharing wealth and resources.
- 9-3-23 Recognize and explain the importance of incorporating principles of electrical energy conservation into the decision making process.

Grade 10 Social Studies & Science

- VL-005 Respect the Earth as a complex environment in which humans have important responsibilities.
- KC-002 Describe sustainability issues related to natural resource extraction and consumption.
● KG-035 Identify implications of more-developed countries extracting resources from less-developed countries.
● VP-009 Be willing to consider the implications of personal choices regarding natural resources.
● KG-037 Give examples of the potential impact of climate change on food production.
● VG-008 Be willing to consider the social and environmental impacts of their consumer choices.
● VE-011 Be willing to consider the economic implications of their consumer choices.
● KL-030 Describe urban environmental and economic issues.
● 10-1-10 Investigate how human activities affect an ecosystem and use the decision making model to propose a course of action to enhance its sustainability.
● 10-4-07 Investigate and evaluate evidence that climatic change occurs naturally and can be influenced by human activities.
● 10-4-08 Discuss potential consequences of climate change.

**Grade 11 Current Topics in the Sciences, example themes:**
● What in the World Is Climate Change?
● Environmental Interactions
● Global Warming: Fact or Fiction?
● Is the World Doing Enough to Reduce Pollution?

**Grade 12**
Interdisciplinary Topics in Science
● GLO B - Science, Technology, Society, and the Environment: Explore problems and issues that demonstrate interdependence among science, technology, society and the environment within the context of sustainability
● GLO C – Scientific and Technological Skills and Attitudes: Demonstrate appropriate inquiry, problem-solving, and decision-making skills and attitudes, for exploring scientific and/or technological issues and problems.

Global Issues: Citizenship and Sustainability
